Quality RD biobanks are listed in the **Registry & Biobanks Finder** directory of biobanks and patient registries, and their specimen collections made findable via the online **Sample Catalogue**.

EuroBioBank is the *de facto* biobank network of **RD-Connect**. Current members are located in 11 countries (see map), and together hold more than 150,000 biological samples for 950 rare diseases.

Members of EuroBioBank

The centralised **Sample Catalogue** is the key tool allowing rare disease researchers to quickly search or browse sample collections from member biobanks, and locate the exact bio-materials they need for their studies. As a part of the integrated platform, researchers can also locate registries and explore genomes available in the **RD-Connect** database.

- Be a biobank with rare disease focus
- Be willing to submit sample-level dataset of your rare disease sample collections (based on MIABIS 2.0)
- Complete a questionnaire via **Registry & Biobank Finder** and a straightforward evaluation process

- Improve visibility of your biobank
- Become a member of **RD-Connect EuroBioBank**
- Access training materials and data export guides
- Share data to support research and drug discovery
- Get advice on how to share data without compromising patient privacy
- Become a partner in research programs and calls, such as BBMRI-LPC Sequencing Call
